Strong Voice Encryption

The NDB-GSM Secure Phone comes with full source code available for independent review. Therefore, you may perform an independent assessment to ensure that you can rely on strong encryption without any backdoors in the communications device that you entrust your security to.

The NDB-GSM Secure Phone enables you to put the trust where it belongs – in a trustworthy, open and scientific verification process.

Nabishi Encryption technology is based on well-researched algorithms for both encryption and voice processing. It features the strongest encryption available combined with key lengths that provide peace of mind today and in the future

TECHNICAL SPECIFICATIONS

Phone

GSM quad-band 850/900/1800/ 1900MHz, EDGE EGPRS class B, multi-slot class 10, CSD

Encryption

Strongest and most secure algorithms available today – AES256 and Twofish. 4096 bit Diffie-Hellman key exchange with SHA256 hash function, readout-hash based key authentication, 256 bit effective key length, encryption key is destroyed as soon as the call ends.

Nabishi NDB-GSM are the only secure mobile phones on the market with full source code published for independent security assessments. They contain no »proprietary« or »secret« encryption, no backdoors, no key-escrow, no centralized or operator-owned key generation, and require no key registration. **Now with Secure Text and Secure Storage**

Interoperability

Fully compatible with all Nabishi NDB-GSM mobile, satellite and fixed-line encryption products

Dimensions & Weight

98.5 x 51.4 x 15.8 mm, 99g incl. battery, integrated antenna, slimline clamshell design, black color scheme

Operational Features

Talk time up to 7 hours, standby time up to 150 hours, hardened WM5 operating system

Standard Accessories

100-240V AC adapter, USB sync cable, stereo headset with microphone

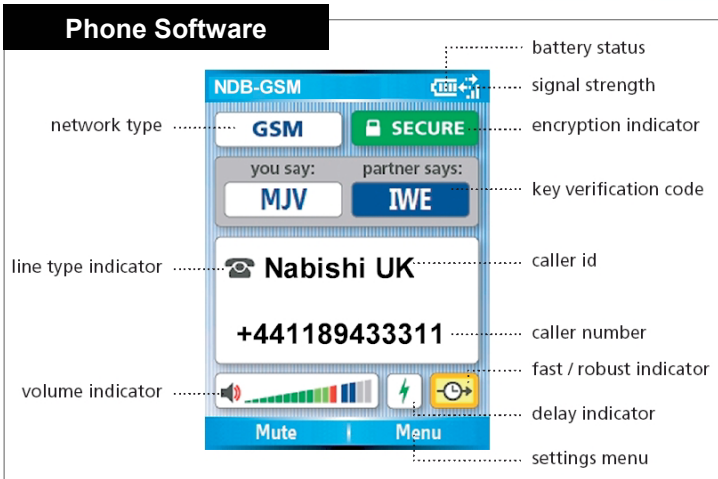

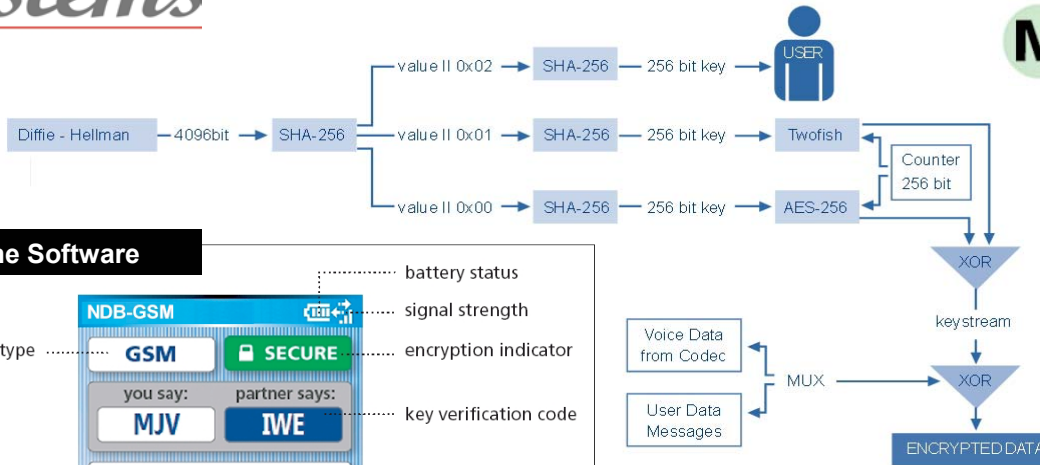

Optional Accessories

12V car charger, solar panel charger, vehicle mount kit, ruggedized military carrying case

Satellite Upgrade Option

Upgradeable to dual-mode secure GSM and Thuraya satellite communications using the NAB GSM Secure Phone upgrade package

Nabishi NDB-GSM Secure Phone Quad Band GSM Phone with speech security

Encryption Overview
